Description

The European Union (EU) is a geopolitical entity that covers much of the European continent. It is a unique economic and political association in the world, made up of 27 countries. The common principles and values underlying life in the EU are: freedom, democracy, equality and the rule of law, and the promotion of peace and stability.

The seven European institutions, the eight EU bodies and more than thirty decentralised agencies are spread across the Union. They all work together to address the common interests of European citizens.

Having an overview of the European Institutions and knowing where to go to look for information can help to make the most of the available resources and understand how they work a little better.

Objectives and learning results

- What is the European Union?

- Get to know the Institutions of the European Union.

- Get to know the main sources of information on European issues.

At the end of the session, the student will be able to locate the information that the European Union makes available to citizens.

Content

- Definition. Structures of the European Union. Priorities.
- European Documentation Centre of the EU. URV.
- Brief explanation of the main sources of information in the European Union.

Methodology

Overview and online access to resources. Presentation in PDF format in Spanish, English and Catalan. Guide to the URV European Documentation Centre available in Catalan, Spanish and English.

Assessment and certification

To obtain the certificate of attendance it is necessary to attend 80% of the session. The certificate will be received by email.
